

ADITYA KADAM

Linux Server Administrator | IT Infrastructure Engineer

+91 9420788394 adikadam7933@gmail.com Mumbai, India

PROFESSIONAL SUMMARY

Linux Server Administrator with 4+ years of experience managing and maintaining enterprise Linux systems. Skilled in installation, configuration, monitoring, and troubleshooting to ensure high availability and performance. Experienced in vulnerability management, OS hardening, and in-place OS upgrades. Strong expertise in designing monitoring mechanisms for proactive issue resolution. Adept at using automation to optimize server performance while maintaining a strong focus on infrastructure security.

CORE COMPETENCIES AND TECHNICAL SKILLS

RHEL 7/8/9/10	CentOS / Ubuntu	Oracle Linux	OS Hardening
Vulnerability Mgmt	VA/PT Remediation	User Recertification	Security Compliance
Zabbix Monitoring	Grafana	Apache Tomcat	Docker
Shell Scripting	LVM / Disk Mgmt	NFS / FTP / Samba	Backup and Recovery
SSL / TLS / PKI	User Access Control	OS Migration	Patch Management

PROFESSIONAL EXPERIENCE

Linux Server Administrator

Jan 2024 - Present | Mumbai, India

Hypertech Solution (Client: Kotak Securities and Kotak AMC)

- Provided security expertise for Linux environments, ensuring secure deployment and configuration of enterprise servers.
- Performed OS installation, configuration, and hardening on RHEL, CentOS, and Ubuntu servers to achieve compliance standards.
- Led vulnerability management initiatives by identifying and resolving security vulnerabilities to strengthen overall infrastructure security.
- Conducted VA/PT remediation, risk analysis, and collaborated with security teams for compliance remediation closure.
- Executed OS migrations and upgrades (CentOS to RHEL, RHEL upgrades) with minimal downtime, planning rollback procedures and coordinating with application teams.
- Designed and implemented monitoring mechanisms using Zabbix for proactive incident detection; configured alert escalations and custom dashboards.
- Managed user access control, privilege management, and periodic recertification aligned with IT security policies.
- Administered Apache Tomcat securely for enterprise applications, including migration to latest stable versions.
- Performed OS administration including patching, hardening, and performance tuning for production systems.
- Implemented SSL certificates, CSR key generation, and secure communication protocols; managed complete certificate lifecycle.
- Managed backup and recovery processes and validated restore procedures to guarantee business continuity.

Linux Administrator

Sept 2021 - Dec 2023 | Mumbai, India

Active InfoTech

- Installed, upgraded, and maintained Linux systems (RHEL, Ubuntu, CentOS) across physical and virtual environments, supporting 24/7 production operations.
- Performed patching across the server fleet to maintain system stability and security.
- Managed user access, permissions, sudo privileges, and periodic access recertification in alignment with IT security policies.
- Configured and maintained network services including NFS, FTP, HTTP, and Samba to support business operations.
- Implemented backup solutions using rsync and cron jobs.
- Monitored system performance and resolved production issues efficiently, maintaining high availability for critical systems.

EDUCATION

Bachelor of Computer Science

Mumbai University

LANGUAGES

English | Hindi | Marathi
